

Four Questions Every Veterinary Hospital Should Ask Their Anesthesia Machine Service Provider

Michelle McConnell, LVT, VTS (anesthesia and analgesia)

1. **Is your Anesthesia Machine Service Technician a Credentialed Veterinary Technician with at least three years of veterinary anesthesia experience?** Vetamac only hires credentialed veterinary technicians with at least three years of anesthesia experience. This ensures Vetamac Service Technicians are knowledgeable and have had clinical experience performing anesthetic episodes from start to finish using anesthesia equipment. Vetamac also hires credentialed Veterinary Technicians because we provide in clinic RACE approved CE seminars for DVMs and technicians.
2. **Does your anesthesia machine service provider have an extensive training program for their service technicians with a yearly anesthesia machine maintenance continuing education program?** Vetamac Service Technicians undergo a rigorous training program. During this training program our Vetamac Anesthesia Machine Service Technicians will service most every type of veterinary anesthesia machine on the market; old and new. Vetamac Service Technicians are also put in real veterinary hospital situations with a trained Senior Technician to gain real world knowledge and education about all types of anesthesia equipment and scenarios. Vetamac holds a yearly weeklong meeting that all Vetamac Technicians are required to attend. During this meeting Vetamac Technicians undergo advanced anesthesia equipment servicing continuing education.
3. **Does your Anesthesia Machine service Provider leave your clinic with their cell phone number and email?** After a Vetamac Service Technician performs the annual service on the anesthesia equipment, they always take time to answer any questions you may have. Our dedicated technicians also leave their cell phone number and email so the clinic can contact their Vetamac Technician with any questions or concerns throughout the year.
4. **Is your Anesthesia Machine service Provider nationwide?** Vetamac provides nationwide anesthesia machine service. Vetamac also offers nationwide medical gas equipment installation.

Vetamac is your dedicated and most knowledgeable choice when it comes to selecting a company to service your anesthesia equipment. Our Vetamac Technicians take pride in increasing patient safety by ensuring your anesthesia equipment is serviced and functioning correctly to our high standards. Vetamac leads the way and performs the most detailed service for your anesthesia machines. Call us today to schedule your anesthesia machine service.
